- System analysis and design using the UML.
- JIRA for task management and Git for version control.
- Participate actively in daily scrum and project planning meetings.

EDUCATION

B.Sc Computer Sciences and Mathematics | [University Of Limpopo](#)

Jan 2017 – Jul 2021

Polokwane, South Africa

Matric | [Mahwahwa High School](#)

2015

Tzaneen, South Africa

PROJECTS

E-Commerce App

- Purpose of the project: To build a web application that allows users to purchase tangible items through the internet rather than in person. A business can handle orders, receive payments, manage shipping and logistics, and provide customer care through an e-commerce website.
- Project duration: Three months
- Your role: Created models and servlet
- Review source code: <https://github.com/ophney/E-Commerce-App>

Test Automation Framework

- Purpose of the project: To learn how to automate testing and deliver new releases faster than ever before.
- Project duration: Three weeks
- Your role: Created Step Definitions
- Review source code: <https://github.com/ophney/Test-Automation-Framework>
